## Hydraulic Column Stretcher VLT-714

# VLT-714

## Hydraulic Column Stretcher

**BASE**  
Inferior fairing made of high resistance thermo-formed material, with a cavity for an oxygen cylinder and another for patient objects.

**MATRESS PLATFORM**  
Structure with stringers, built with rectangular tubes 30 x 70 mm. Bed built with square tubes of 25 x 25 mm, being articulated and radio transparent. It has an x-ray drawer system that moves freely below the bed, allowing x-ray in all its extension without disturbing the patient.

**SHOCKHOLDERS**  
Side wall protections, rotating fronts on all four corners of the stretcher.

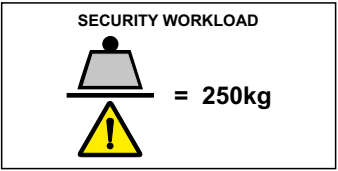

**FINISHMENTS**  
Pushers in both directions of the stretcher.

**SIDERAILS**  
Hinged side rails in round stainless steel tube.

**MOVEMENTS**  
Back movements driven by a double pneumatic system. Lifting system by two hydraulic columns driven by pedals, allows height elevation, trendelenburg and reverse trendelenburg.

**CASTERS**  
150 mm diameter wheel with central brake system, one wheel being directional.

**ACCESSORIES**  
It comes with a foam mattress pad with synthetic leather covering and a IV pole.

SECURITY WORKLOAD

= 250kg
